

TOPPINO'S PIZZERIA

Website Design & Development Brief

Brand Relaunch • Ahmedabad • English Website

A food-first, premium-but-welcoming digital presence designed to drive discovery, menu views, visits and future online ordering.

Planned domain: toppinospizzeria.in

Location: Near Ornet Park, 3, Sindhu Bhavan Marg, PRL Colony, Thaltej, Ahmedabad, Gujarat 380059, India

Prepared from the current brand and business requirements supplied by the client/project owner.

1. Project Overview

Topino's Pizzeria is being relaunched as a Turkish–Italian café in Ahmedabad, with a strong focus on authentic brick-oven pizza, Turkish breads/dishes, premium hospitality and a warm, handcrafted atmosphere.

The website is not intended to be an information-heavy corporate site. It should behave like a modern restaurant website: put the food first, make the menu effortless to access, make visiting the café easy, and create a strong first impression for a new/relaunched brand.

Core website objectives

- Establish a strong online presence for the brand relaunch.
- Attract more customers to the café.
- Showcase the menu visually with food photography.
- Provide a fast, mobile-friendly QR menu for customers at the café.
- Make location, contact and social channels immediately accessible.
- Support future Zomato and Swiggy ordering without requiring a redesign.
- Create a foundation for local SEO and Google discovery.
- Allow the project owner to manage routine website content after launch.

2. Brand Positioning

Business type: Turkish–Italian Café / Neapolitan Pizzeria

Core offering: Brick-oven pizza, Turkish breads/dishes, with additional menu categories to be finalized.

Positioning: Premium and quality-driven, without presenting the brand as inaccessible or “luxury.”

Brand personality

- Rustic
- Artisan
- Handcrafted
- Warm
- Welcoming
- Family-friendly
- Premium
- Elegant
- Sophisticated
- Vibrant

Visual direction

- Warm tones with natural green accents, inspired by the supplied logo.
- A tactile, handcrafted feel rather than a corporate or overly glossy aesthetic.
- Premium presentation while remaining approachable and family-friendly.
- Food should be the visual hero.
- Use natural textures, subtle artisan cues and strong food photography where appropriate.

3. Target Audience

The brand is designed to appeal broadly, while retaining a premium quality perception.

- Families
- Couples and date-night customers
- College students
- Working professionals and young professionals
- Groups of friends
- Health-conscious / fitness-oriented customers
- Premium / higher-income customers
- Italian and Turkish food enthusiasts
- Pizza enthusiasts

Note: Morning salads may provide a specific health-conscious use case; the final menu and serving times are still being finalized.

4. Website Structure & Navigation

Keep the primary navigation simple, premium and uncluttered. The following pages should form the main information architecture:

Primary page	Purpose
Home	Food-first introduction, brand impression, key CTAs and location.
Menu	Visual digital menu with dish images, descriptions and prices when finalized.
About Topino's	Brand overview, philosophy and the relaunch story once content is available.
Visit Us / Location	Address, map, directions, opening hours and essential visit information.
Contact Us	Phone, WhatsApp, email and enquiry information.
Franchise Opportunity	Future-facing page; not an active franchise application at launch.

- Do not add a separate Gallery page at this stage.
- Do not add a separate “Food & Specialties” page; specialties belong naturally inside the Menu and homepage.
- Instagram should be accessible through the site/footer/social CTA rather than necessarily being a full primary navigation page.
- QR Menu should be a key access point to the Menu, not necessarily a separate content-heavy page.

5. Homepage — Recommended Structure

The homepage should follow a food-first philosophy. The user should understand what Topino's is and have an immediate path to the menu within seconds.

Hero section

- Preferred format: short cinematic food video, with a strong still-image fallback until professional photography/video is ready.
- Show brick-oven pizza being prepared/baked, Turkish food, coffee and the café atmosphere where available.
- Primary headline should communicate the Italian/Turkish identity without sounding generic.
- Primary CTA: View Menu.
- Secondary CTA: Visit Topino's / Get Directions.
- Do not delay the food experience with a long introductory animation or brand-only splash screen.

Recommended homepage flow

- Hero: food/video + View Menu + Visit Us.
- Short brand positioning: premium, handcrafted Turkish–Italian café.
- Featured/signature dishes — to be added after the chef/menu is finalized.
- Menu preview with strong food imagery and a View Full Menu CTA.
- Brick-oven / live-kitchen experience section.
- Morning / salad offering section if retained in the final menu.
- Ambience / interior section once photography is available.
- Google Reviews / social proof.
- Location + opening hours + Get Directions.

- Instagram/social CTA.
- Footer with contact, social links, legal links and future ordering links.

6. Menu & QR Menu

The menu is one of the most important parts of the website. It should be visual rather than a plain text list.

- Every menu item should support a food image.
- Show item name, short description and price once finalized.
- Use clear category navigation and/or tabs once the final menu structure is decided.
- Design for mobile first because customers will access the menu through a QR code.
- Keep image loading optimized so the QR menu opens quickly on mobile networks.
- The QR experience should go directly to the digital menu with minimal friction.
- The menu system must be easy for the site manager to update.
- Do not hard-code the menu in a way that requires a developer for every price or item change.

Confirmed menu direction: Pizzas and Turkish breads/pide are confirmed. Additional Turkish dishes, salads, coffee and other categories are still being finalized.

Signature dishes are not yet defined and should be added only after the head chef finalizes and tests the menu.

7. Brand & Content Requirements

Current brand assets available

- Logo — supplied with this brief.
- Brand colors — already established.
- Brand fonts — already established.

Assets still to be created/provided

- Professional food photography.
- Interior photography/video.
- Live-kitchen photography/video.
- Final menu and pricing.
- Final opening hours.
- Final phone, WhatsApp and email details.
- Instagram content/profile details.
- Formal brand guidelines.

Recommended lightweight brand guideline

- Logo rules and clear space.
- Exact color values (HEX/RGB/CMYK as required).
- Typography hierarchy.
- Photography direction.
- Tone of voice.
- Patterns/textures/graphic elements, if used.

- Digital menu and QR styling.

8. Customer Actions & Integrations

Action / integration	Requirement
View Menu	Primary website CTA.
Get Directions	Prominent location CTA linked to the selected map/directions service.
Call	Clickable phone CTA.
WhatsApp	Clickable WhatsApp CTA.
Instagram	Social link; account is being prepared.
Google Reviews	Prominent social-proof / review CTA.
Contact / Enquiry	Simple contact method; no table reservation required.
Zomato / Swiggy	Future "Order Online" links; architecture should support adding them later.

9. Franchise Opportunity

Keep a Franchise Opportunity page in the site structure because franchising may become relevant in the future. It should not present unconfirmed investment figures, returns or application promises.

Recommended launch approach: a concise, brand-led page explaining that Topino's is exploring future expansion opportunities, with an enquiry CTA if desired. Detailed franchise economics can be added when officially approved.

10. CMS / Admin Requirements

The project owner will manage the website after launch. The developer should therefore provide a straightforward CMS/admin experience.

- Update menu items, images, descriptions and prices.
- Update opening hours and contact details.
- Update homepage featured content.
- Add or remove menu categories.
- Manage links to future Zomato/Swiggy ordering.
- Update basic text content without developer intervention.
- Provide basic media management and optimized image upload guidance.

11. SEO & Analytics

SEO should be implemented from the beginning, with a strong local-search focus for Ahmedabad and Thaltej.

- Google Analytics setup.
- Google Search Console setup and verification.
- Google-friendly page titles and meta descriptions.
- Local business / restaurant structured data where appropriate.
- Location-focused copy without keyword stuffing.
- Optimized headings, image alt text and internal linking.
- Fast mobile performance and Core Web Vitals considerations.

- XML sitemap, robots.txt and canonical URL setup.
- Open Graph/social sharing metadata.
- Indexation checks before launch.

Potential search themes include brick-oven pizza, Neapolitan pizza, Turkish food, Italian food, café/restaurant searches and relevant Ahmedabad/Thaltej queries. Final keyword research should be completed by the SEO implementer.

12. Technical & UX Requirements

- Mobile-first responsive design.
- Fast loading, particularly for the QR menu.
- Clear navigation and large touch-friendly CTAs.
- Accessible typography and sufficient contrast.
- Optimized WebP/AVIF or equivalent modern image formats where supported.
- Lazy-load below-the-fold imagery/video where appropriate.
- Avoid unnecessary pop-ups and heavy animations.
- Secure HTTPS deployment.
- Basic spam protection on contact/enquiry forms.
- Easy future addition of ordering links.
- Analytics events for important actions such as Menu, WhatsApp, Directions, Instagram and Order Online clicks.

13. Photography Brief

Professional photography will be important to the site's success. The visual language should reinforce the artisan/premium positioning.

- Hero-quality brick-oven pizza image/video.
- Pizza entering/leaving the brick oven.
- Dough preparation / handcrafted process.
- Pide and Turkish breads.
- Selected Turkish dishes after final menu approval.
- Salad selection for morning offering.
- Angara coffee / specialty coffee preparation.
- Chef at work only if later approved as part of the brand story.
- Interior wide shots.
- Atmospheric details: oven, textures, tables, ingredients, hands, plating.
- People enjoying the café naturally, with family/couple/group scenarios.
- Vertical crops for mobile/social use and horizontal hero images.

14. Tone of Voice & Copy Direction

Copy should feel confident, warm and appetizing. Avoid corporate jargon, exaggerated luxury language and unsupported claims.

- Premium but approachable.
- Craft-focused and authentic.

- Short, memorable headings.
- Clear descriptions rather than overly poetic food copy.
- Emphasize handcrafted preparation, brick-oven cooking, quality and the Italian/Turkish combination.
- Do not claim specific culinary authenticity, certifications or chef credentials unless verified.

15. Launch Plan

The website has no fixed launch date. It should launch as soon as the build and required content are ready.

- During development: use a simple Coming Soon / Under Construction state if the public domain needs to be active.
- Before launch: final menu, pricing, contact information, hours and social links must be checked.
- Before launch: test QR menu on multiple mobile devices.
- Before launch: test WhatsApp, phone, directions, Instagram and Google Review links.
- Before launch: verify Analytics and Search Console.
- Before launch: test future Order Online component/link architecture.
- After launch: monitor analytics, search indexing and customer behavior.

16. Open Items / To Be Finalized

- Final menu categories and complete menu.
- Final dish names, descriptions, images and prices.
- Signature dishes.
- Final opening hours.
- Official phone number, WhatsApp number and email.
- Instagram handle/link.
- Professional food photography and café photography.
- Final brand guideline document.
- Future Zomato and Swiggy links.
- Final franchise messaging.
- Business email provider and chosen email address.

17. Recommended Business Email

A professional email should be set up using the business domain rather than a personal/free email address.

- Recommended primary address: hello@toppinospizzeria.in
- Alternative: info@toppinospizzeria.in
- Optional future addresses: orders@..., careers@..., franchise@...

The final address should be selected based on how the Topino's team plans to handle customer enquiries.

18. Final Design Direction — One-Line Summary

“A food-first, mobile-first Turkish–Italian café website that combines the clarity and conversion focus of a leading restaurant ordering site with Topino's own warm, rustic, artisan and premium identity.”

This document is a working brief. Items marked as future / to be finalized should be updated as the menu, photography, contact details and operations are completed.
